

Alekhya Vadapally

+91 9014249392 | vadapallyalekhya6219@gmail.com | [LinkedIn](#) | [GitHub](#) | Hyderabad, Telangana

TECHNICAL SKILLS

Frontend:	React.js, JavaScript (ES6+), HTML5, CSS3, React Hooks, Axios, Material UI
Backend:	Java, Spring Boot, REST API Development, CRUD Operations
Database:	MySQL
Testing:	Jest, React Testing Library, Unit Testing, Postman
DevOps/Tools:	Git, GitHub (branching, PRs, code reviews), GitHub Actions (CI/CD), VS Code, Eclipse, Jira
Methodology:	Agile (Scrum) — sprint planning, stand-ups, retrospectives

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on production experience delivering end-to-end healthcare modules using React.js and Spring Boot. Designed and developed RESTful APIs, built responsive UI screens, and integrated frontend-backend systems across three product modules — Doctors, Pharmacy, and Diagnostics — at Virinchi Technologies. Proven ability to take ownership of features from architecture to deployment, write testable code using Jest and React Testing Library, and debug issues using browser DevTools and Spring Boot logs. Strong collaborator with experience in Agile sprint cycles and Git-based team workflows.

PROFESSIONAL EXPERIENCE

Full Stack Developer | [Virinchi Technologies](#)

Hyderabad, India

Aug 2025 – May 2026

v23+ Health Portal | [React.js](#), [Spring Boot](#), [REST APIs](#), [MySQL](#) | [Production Application](#)

- Worked on a live, production-grade healthcare portal actively used by clinics, pharmacies, and patients — built and shipped real features under real deadlines in an Agile team environment
- Designed and built 20+ responsive UI screens across 3 core modules — Doctors, Pharmacy, and Diagnostics — using React.js functional components, React Hooks, and Material UI
- Developed and documented RESTful APIs using Spring Boot for appointment booking, e-prescription generation, and lab report retrieval; defined request/response schemas and validated endpoints with Postman
- Consumed REST APIs on the frontend using Axios with async/await, custom error boundaries, and loading state handling for a seamless user experience
- Built doctor appointment scheduling UI enabling patients to view availability, book slots, and manage upcoming visits; implemented date validation and conflict handling logic
- Developed pharmacy module with medication search, multi-vendor price comparison, and order history tracking using React state management
- Built diagnostics module with lab report access (X-Ray, MRI), multi-lab price comparison, test booking, and order management screens
- Wrote unit tests using Jest and React Testing Library achieving 85%+ coverage across core appointment, pharmacy, and e-prescription components
- Debugged 30+ frontend and API-level issues using browser DevTools, network logs, and Spring Boot console logs; tracked and resolved tickets in Jira coordinating with QA team
- Followed Git feature-branching workflow with pull requests and code reviews; used GitHub Actions for basic CI checks to validate builds before merging to main
- Ensured cross-browser compatibility and responsive design across Chrome, Firefox, and Edge on all delivered screens

PROJECTS

v23+ Health Portal | [React.js](#), [Spring Boot](#), [REST APIs](#), [MySQL](#), [JavaScript](#), [CSS3](#)

Aug 2025 – May 2026

- End-to-end healthcare portal for clinics and pharmacies to manage appointments, prescriptions, pharmacy inventory, and diagnostics workflows

- Implemented e-prescription module allowing doctors to specify medications, dosage, and instructions digitally — eliminating paper prescriptions and reducing prescription loss
- Designed module architecture from scratch including component hierarchy, API contracts, and database schema in collaboration with backend team

E-Commerce Web Application | *Java, Spring Boot, MySQL, React.js, HTML, CSS,*

Jul 2024 – Feb 2025

JavaScript

- Designed and developed a full stack e-commerce application with product listing, cart management, and order processing — built end-to-end from DB schema to UI
- Built Spring Boot REST API backend with MySQL; developed React.js frontend with Bootstrap for responsive layout
- Tested all API endpoints via Postman; managed source code with Git/GitHub including branching and version control

SpendWise — Expense Tracker | *React.js, JavaScript, CSS3*

🔗 Live : <https://expense-tracker-fui.netlify.app/>

- Built and deployed a full-featured personal finance tracker with category-based expense logging, budget tracking, and visual summaries
- Implemented React state management with hooks (useState, useEffect) for real-time UI updates; deployed live on Netlify
- Practiced component-driven architecture, responsive layout, and cross-browser testing

EDUCATION

B.Tech in Computer Science and Engineering

Jun 2020 – May 2024

JNTUH – Jyothishmathi Institute of Technology and Science, Karimnagar

CGPA: 7.3 / 10

CERTIFICATIONS & TRAINING

- Java Full Stack Course — Codegnan IT Solutions Pvt Ltd | Jul 2024 – Feb 2025 | Grade: A+
- Web Design Intern — Oasis Infobyte
- TCS iON Career Edge – Young Professional
